DETAILED ACTION

Response to Amendment

1. Applicant's arguments, filed 11/15/2004, with respect to the rejection(s) of claim(s) 1-21 have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1, 12 and 21 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Each claim states forwarding control codes and an authentication code to a physical layer which signals a security violation if the control codes are inconsistent with the authentication code. As is well known in the art, the physical layer relates to gaining access to a medium and putting bits on the wire or extracting bits from the wire, the physical layer deals with issues such as volts, and amps. It is unclear how the physical layer could be used in authentication. The physical layer protocol is not capable of such an action.

Art Unit: 2134

The applicant describes the physical layer on page 5 lines 11-18 of the instant specification. There are no indications of how the physical layer could be used in an authentication method.

Also the definition of the physical layer can be found on page 302 of the Microsoft Computer Dictionary second edition. The definition agrees with the applicants description on page 5 lines 11-18, but does not provide for authentication.

Claims 1, 12 and 21 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Each claim states the control codes being "inconsistent" with the authentication code. It is not clear what the applicant the applicant is referring to as "inconsistent". The term "inconsistent" is broad and indefinite.

Claim 21 recites the limitation "the transceiver" in line 5. There is insufficient antecedent basis for this limitation in the claim.

Claims 2-11, and 13-20 are rejected based on their dependence on the rejected independent claims.

Conclusion

3. The Previous Non-final office action did not rely on forwarding to a physical layer for authentication because that is not typically what a physical layer does.
